HCD 1501-40

Computerized Single Head

In the HCD-Series machine, HAPPY merges the full capabilities of its larger, renowned industrial lines with a compact package that's also friendly with a wider range of operating budgets. This greater flexibility puts the HCD-series in great demand with all types of embroidery outfits, both big and small.

Full-Industrial Embroidery Machine

In terms of functionality, HCD makes no compromises when compared to its full-sized siblings in the HAPPY line. Engineered in a strong cast-iron frame, HCD may be compact in size, but is built to stand the rigors of commercial sewing. Sometimes big things do come in small packages.

Color LCD Control Panel

Easy and no-nonsense controls, make the HCD-series a snap to learn. Because the faster you learn, the sooner you can be productive!
